

KANSAS BULL TEST

Test #66

Final Weight Report

March 9, 2007

TO: Kansas Bull Test Consignors and Guests:

FROM: Lori Schmitt, H.M. Schmitt, Inc.

We have a very nice set of bulls in Test #66. Regardless of breed, the consignors should be extremely proud of the bulls they have put on test. The sale will be **11:30 a.m., April 4, 2007, at the Mitchell County Fairgrounds in Beloit, KS.** Bulls that are eligible for the sale have been marked with A "YES".

Cattle were scanned for ribeye area, marbling and backfat and that information is enclosed. This year we utilized CUP Ultrasound technology and Ultra Insights, so we are reporting % IMF instead of marbling. The first round of breeding soundness exams have been completed.

The Kansas Bull Test website is up and running. Our address is www.kansasbulltest.com

You are welcome and encouraged to stop by H.M. Schmitt, Inc. during normal business hours. H. M. Schmitt, Inc. is located one mile south of Tipton, Kansas, on Hwy 181. If you have questions concerning bull performance or health, or about the rules and regulations, future KBT dates, or sale inquiries, please contact H. M. Schmitt, Inc. at (785) 373-4824. We look forward to seeing you at the Mitchell County Fairgrounds in Beloit, Kansas, for KBT Sale #66
