Feeding of Bulls

The bulls offered in this sale have been fed rations specifically designed for developing bulls. The nutritional objectives for developing these bulls were to provide adequate energy for the bulls to express their genetic differences for lean growth, yet not so much energy as to over condition the bulls. Further, we wanted to develop healthy, functional rumens, sound feet and legs, and a sound, functional reproductive system so the bulls would have longevity, track well, and breed cows.

To accomplish these objectives the bulls have been developed on moderate energy rations with high levels of protein. Some of the grain has been replaced with the product of wet distiller's grain which is high in natural protein and low on starch. Feeding highly digestible fiber based diets with limited grain and high protein allows development of muscle growth and frame with moderate condition. This type of ration reduces the risk of acidosis and associated problems such as flounder and bloat. They have also been fed a liquid feed to balance and complete the ration to give it a complete level of vitamins and trace minerals needed to develop these bulls.

As you take these bulls home, remember that preparing a young bull for the breeding season can be likened to an athlete training for competition. They need to be on a forage-based diet, but have some supplemental energy and protein. A large lot with feed at one end and water at the other will be conducive to plenty of exercise. Bulls should have access to a high quality mineral that contains a good trace mineral package.

From a nutritional perspective, these bulls have been developed so they have every opportunity to perform well for you. I hope you will be satisfied with your purchase.

SALE TERMS AND CONDITIONS

ANNOUNCEMENTS FROM THE AUCTION BLOCK WILL TAKE PRECEDENCE OVER THE TERMS PRINTED IN THIS CATALOG!

TERMS: The terms of the sale are cash or check payable immediately upon conclusion of sale and before bulls are loaded or removed.

DISPUTES: The Auctioneer will settle any and all disputes as to bids, and his decision will be final.

HANDLING: Each animal will be purchaser's risk as soon as sold. Announcements from the auction box will give details of the handling of bulls from time of sale until loaded on purchaser's vehicle.

BUYER'S PROTECTION: The standard recommendations of the breed Associations concerning any bull that proves to be a non-breeder will apply. Any guarantee will be the responsibility of the individual consignors. If any problems or a bull fails to be a breeder, notify the consignor before the disposing of the bull.

RESPONSIBILITY: Neither the Kansas Bull Test Station nor Sale Management is responsible for any accident nor injury incurred en route to, from or at the sale.

FOR SALE OR TEST INFORMATION, contact: Harry Schmitt (785)-373-4824 or Doug Schmitt (785) 373-5025.

TEST STATION COMMITTEE:

Dave Breiner, Alma (Gelbvieh)
Henry Diehl, Brookville (Commercial Buyer)
Jerry Gilman, Greenleaf (Angus)
Kevin Jensen, Courtland (Hereford), Chairman
Stephen Kaser, Osborne (Simmental)
Lester Laue, Hanover (Charolais)

AUCTIONEER: Stanley Stout

RINGMEN: Guy Peverly, High Plains Journal; Brett Spader, Kansas Stockman, J.W. Brune, Midwest Messenger, and Matt Caldwell, The Angus Beef Bulletin.

SPONSORSHIP: The Kansas Bull Test is sponsored by the KBT Advisory Committee, in conjunction, with H.M. Schmitt, Inc.

INSURANCE: Sheila Jensen, representing Harding & Harding Insurance Company, will be present or can be contacted at 785-374-4372.

OBJECTIVES: (1) To compare performance and conformation of bulls and their sires, (2) To encourage herd improvement through the use of performance tested bulls, and (3) To encourage and assist in use of records as a means to more efficient beef production.

LUNCH: Will be served on the grounds prior to the sale.

PERFORMANCE RECORDS

Animal Name = Registered Name of Bull.

ET = Calf is a result of Embryo Transfer.

Registration Number = Associations identification number.

Twin = If the bull was born a twin.

Index = The overall ranking of the bull within his breed at the test.

$$\text{Index} = \left(\frac{\text{Bull ADG}}{\text{Breed Avg ADG}} + \frac{\text{Bull WDA}}{\text{Breed Avg WDA}} \right) \div 2$$

Breeder = Original owner/breeder of the bull.

Birth Date = Actual birth date.

Tattoo No. = Animals permanent identification in ear.

Color = The bull's color pattern.

Horn Code = Polled/Horned/Scurred.

Breed % = The breed percentage make-up of the bull.

Class = Low Birth Weight: These bulls have met certain BW EPD and actual birth weight criteria. Angus bulls are defined as those with a BW EPD of 2.5 or less and an actual birth weight of 80 pounds or less. Hereford bulls are defined as having a BW EPD of 2.5 or less and an actual birth weight of 100 pounds or less. Charolais bulls are defined as having a BW EPD of 1.0 or less and an actual birth weight of 100 pounds. This category does not guarantee low birth weights, but should be indicative of bulls that should produce lighter calves at birth compared to others within their given breed.

CLASS = Simmental Recognition Rules:

Calving Ease EPD bulls: direct calving ease EPD is in the upper 10% of the breed.

Maternal bulls: maternal calving ease EPD and the maternal weaning weight EPD are both in the upper 20% of breed.

Growth bulls: weaning and yearling weight EPDs are both in the upper 20% of the breed.

Superior bulls: if 4 of the following 5 traits have EPDs in the upper 20% of the breed – direct calving ease, weaning weight, yearling weight, maternal calving ease and maternal weaning weight.

Super bulls: direct calving ease, weaning weight, yearling weight, maternal calving ease and maternal weaning weight EPDs are all in the upper 20% of the breed.

Sire = Sire of the bull.

MGS = Maternal Grand Sire (sire of bull's dam).

Dam = Dam of the bull.

BFAT = 12th rib fat thickness, in.

REA = Adj. 365-Day Yearling Ultrasound REA = 12th rib ribeye area in².

MARB = Adj. 365-Day Yearling Ultrasound Marbling = marbling score.

Birth Weight = Actual birth weight.

Weaning Weight = Provides a measure to evaluate difference in mothering ability of cows and differences in growth potential of calves. It is computed on the basis of average daily gain from birth to weaning and is adjusted to a constant 205 days and for age of dam.

Yearling Wt. = Adjusted 365-day yearling weight.

Final Wt. = Final off-test weight as of March 3, 2004.

Frame Score = An age adjusted measure of type based on the hip height. A 48-inch hip height at 12 months of age equals a Frame Score of 5. For each change in Frame Score, a change of 2 inches in height would be needed at the same age.

SC = Expressed in centimeters. The scrotal circumference is measured when bulls are weighed off test. Scrotal circumference is highly related to semen production and fertility.

ADG = Average daily gain = [(Off-Test Weight - On-Test Weight) / 112 days].

ADG Ratio = Ratio of bull's ADG to his breed's average.

WDA = Weight per day of age = (Off-Test Weight / Off-Test Age).

WDA Ratio = Ratio of bull's WDA to his breed's average.

Expected Progeny Difference By Keith O. Zoellner

It has been the policy of the Kansas Bull Test committee through the years to provide potential buyers with the most complete and accurate performance information available on the sale bulls. As times have changed, additional information has been made available. These tools supply objective information to help producers make more informed decision. The continued search for more accurate and earlier estimates of the breeding potential of animals has led to Expected Progeny Difference (EPDs).

EPDs: The expected difference in performance of a bull's progeny compared to the average progeny performance of all bulls evaluated within the breed. EPD values are reported in standard units (ex. pound for growth traits).

BW EPD = The EPD value predicts the difference in birth weight of a bull's calves compared to all other bulls in the breed.

WW EPD = weaning weight EPD (lbs.) is a within breed predictor of a bull's genetic merit or ability to transmit preweaning growth to his progeny compared to progeny of all other bulls evaluated.

Milk EPD = maternal milk EPD (lbs. of calf weaning weight) is a within breed predictor of a bull's genetic merit or ability to transmit milking or maternal ability to his daughters compared to daughters of all other bulls evaluated.

YW EPD = The EPD value predicts the difference in average 365-day weight of a bull's progeny of all other bulls evaluated within the breed. Yearling weight EPD (lbs.) is a predictor of a bull's genetic merit or ability to transmit preweaning and postweaning growth to his progeny compared to progeny of all other bulls evaluated.

Calving Ease (CE): The ease with which a bull's calves are born to first-calf heifers. It is reported as a percent difference in calving ease from the base. A +10 EPD bull would expect to have 15% more unassisted births than a -5 EPD bull.

Maternal Calving Ease (MCE): The ease with which a bull's daughters calve as first-calf heifers. Reported as a percent difference in calving ease from the base. The daughters from a +5 bull would be expected to calve with 10% more unassisted births than those from a -5 bull.

Maternal Weaning Weight (MWW): The weaning weight of a bull's daughters' calves. This value combines both the milking ability of a bull's daughters and the growth potential of their calves.

CWT = carcass weight EPD (cwt) is a within breed predictor of a bull's genetic merit or ability to transmit pounds of carcass weight to his progeny compared to progeny of all other bulls evaluated

MRB EPD = 12th rib % intramuscular fat EPD is a within breed predictor of a bull's genetic merit or ability to transmit marbling (intramuscular fat) to his progeny compared to progeny of all other bulls evaluated at a given slaughter endpoint

REA EPD = ribeye area EPD (sq. in.) at the 12th rib is a within breed predictor of a bull's genetic merit or ability to transmit ribeye size to his progeny compared to progeny of all other bulls.

FAT EPD = 12th rib fat thickness EPD (in.) is a within breed predictor of a bull's genetic merit or ability to transmit external fat to his progeny compared to progeny of all other bulls.

PERFORMANCE INFORMATION:

INDEX: The test index is used to rank the sale order within each breed. It is the average of the bull's WDA and 112-day test ADG ratios.

SALE BULLS: For all breeds, the top 60% of bulls by index with Adj. SC of = 32 cm are eligible to sell. Low birth weight regulations are as follows: a.) an actual birth weight of less than 90 pounds and birth weight EPD's of b.) Angus bulls, less than or equal to 2.0; Charolais bulls, less than or equal to 1.0; or Hereford bulls less than or equal to 2.5.

BULLS SCREENED: The bulls in the sale have been screened, and only those deemed structurally sound by physical examination have been offered for sale. All sale bulls will have a breeding soundness examination.
